**Computer methods
in applied
mechanics and
engineering**

Contents Volume 147

Volume 147, Nos. 1-2, 30 July 1997

On the fractal fracture in brittle structures. Numerical approach <i>O.K. Panagouli, E.S. Mistakidis and P.D. Panagiotopoulos</i>	1
Parameter identification for finite deformation elasto-plasticity in principal directions <i>R. Mahnken and E. Stein</i>	17
Finite element modelling of surface tension effects using a Lagrangian-Eulerian kinematic description <i>S.E. Navti, K. Ravindran, C. Taylor and R.W. Lewis</i>	41
Unconditionally stable higher-order Newmark methods by sub-stepping procedure <i>T.C. Fung</i>	61
Finite volume schemes for elliptic and elliptic-hyperbolic problems on triangular meshes <i>R. Herbin and O. Labergerie</i>	85
A high-order upwind method for the convection-diffusion problem <i>D. Liang and W. Zhao</i>	105
Coupled rigid-elastic motion of filament-wound composite robotic arms <i>S. Oral and S.K. Ider</i>	117
The equivalence of stress- and strain-based plasticity theories <i>P.F. Lu and R. Vaziri</i>	125
Predictor-corrector finite element approach for electroelastic analysis of hybrid composite plates <i>K. Xu and A.K. Noor</i>	139
Modelling an undular bore with B-splines <i>L.R.T. Gardner, G.A. Gardner, F.A. Ayoub and N.K. Amein</i>	147
Computational procedure for simulating the contact/impact response in flexible multibody systems <i>T.M. Wasfy and A.K. Noor</i>	153
Convergence of Newton-type methods in incremental return mapping analysis of elasto-plastic problems <i>R. Blaheta</i>	167
Structural damage detection using measured FRF data <i>Z. Wang, R.M. Lin and M.K. Lim</i>	187
A finite volume method for analysing the bending deformation of thick and thin plates <i>M.A. Wheel</i>	199

Volume 147, Nos. 3-4, 5 August 1997

A straightforward structure to construct shape functions for variable p -order meshes <i>M.S. Shephard, S. Dey and J.E. Flaherty</i>	209
A simple impedance-infinite element for the finite element solution of the three-dimensional wave equation in unbounded domains <i>L.F. Kallivokas, J. Bielak and R.C. MacCamy</i>	235
Artificial boundary conditions for two-dimensional incompressible viscous flows around an obstacle <i>W. Bao</i>	263
Efficient redesign of damped structural systems for target transfer functions <i>I. Takewaki</i>	275
Asymptotic derivation of a general linear model for thin-walled elastic rods <i>J.M. Rodríguez and J.M. Viaño</i>	287
Virtual experiment as an educational aid in tribology of cutting <i>V. Marinov and I. Andonov</i>	323
The scaled boundary finite-element method—alias consistent infinitesimal finite-element cell method—for elastodynamics <i>C. Song and J. Wolf</i>	329
Two-stage strategy for simultaneous slewing and vibration suppression of flexible structures <i>X. Liu and J. Onoda</i>	357
Numerical simulation for the problem of infinite elastic foundation <i>H. Han, W. Bao and T. Wang</i>	369
A stabilized finite element method for particulate two-phase flow equations. Laminar isothermal flow <i>K. Hiltunen</i>	387
Automatic remeshing for three-dimensional finite element simulation of welding <i>L.-E. Lindgren, H.-Å. Häggblad, J.M.J. McDill and A.S. Oddy</i>	401
